Summary

Motivated and enthusiastic individual looking to start a career in data-related roles with skills in data analysis, visualization and research. Familiar with SQL, Excel, and tools like Power BI. Eager to learn and apply data insights to help businesses make better decisions.

Education

Lakshmi Narain College Of Technology **Oct. 2020 – June 2024**
Bachelor of Technology in Mechanical Engineering *Bhopal, MP*

DP DUBEY H.S. School **2020**
Class XII (Senior Secondary) *Itarsi, MP*

KENDRIYA VIDYALAYA NO.2 **2018**
Class X (Secondary) *Itarsi, MP*

Projects

Student Management Database System | *SQL*

- Designed and developed a relational database to manage student academic records.
- Created tables with appropriate data types, primary/foreign keys, and constraints.
- Performed SQL operations such as SELECT, JOIN, INSERT, UPDATE, and DELETE.
- Ensured data integrity and efficient retrieval of student information.

Adidas Sales Performance Dashboard | *Power BI*

- Developed an interactive Power BI dashboard analyzing 900M+ sales and 332M operating profit.
- Created KPI cards and visualizations to track sales by retailer, region, and product category.
- Used Power Query for data cleaning and DAX to calculate key metrics like total sales and profit.

Global YouTube Statistics Dashboard | *Power BI*

- Built a Power BI dashboard analyzing 995 channels across 50 countries with 11T total views.
- Designed KPI indicators for subscribers, uploads, and earnings with dynamic slicers for filtering.
- Applied DAX measures and visualizations to generate insights on channel growth and revenue trends.

Technical Skills

Languages: Python, SQL, HTML
Tools: Excel, Power BI, PowerPoint
Data Quality & Management: Data Visualization, Data Cleaning

Training / Certifications

Besant Technologies **July 2024 – Dec 2024**
Data Analyst Training Program (Power BI, SQL, Excel, Python) *Bangalore, India*

- Completed hands-on training in data analysis, data cleaning, and dashboard development.
- Created interactive dashboards using Power BI with DAX and slicers.
- Worked with SQL queries including SELECT, JOIN, GROUP BY, subqueries, and aggregate functions.
- Used advanced Excel functions such as Pivot Tables, VLOOKUP, INDEX-MATCH for reporting.
- Used Python for basic data analysis and data manipulation.
